

Australia Existing Cyberattack Capabilities

Capability	Effect	Target
<i>AIS Spoofing</i>	Spoof a ships Automatic identification System to make it seem that the ship is somewhere else.	Any
<i>Stock Exchange Vulnerability</i>	Utilize vulnerabilities to mess with or damage a major stock exchange, causing chaos.	Beijing Stock Exchange
<i>Power Grid Vulnerability (Tactical)</i>	Exploit vulnerabilities for targeted shut down of the enemy's power grid.	Hainan Island
<i>Phone Infrastructure Vulnerability</i>	Use exploits to degrade or disrupt phone infrastructure to support an operation.	Xinjiang Province
<i>Narrative Bombardment</i>	A narrative bombardment involves the coordinated use of as many means as possible to push a select message for a specific target demographic.	PSIDS

Canada Existing Cyberattack Capabilities

Capability	Effect	Target
<i>Oil Infrastructure Vulnerability</i>	Attack oil pipeline PLC's to destroy and disrupt enemy civilian oil infrastructure.	Taiwan
<i>Narrative Bombardment</i>	A narrative bombardment involves the coordinated use of as many means as possible to push a select message for a specific target demographic.	Wealthy English speaking Chinese
<i>Internet Disruption via IOT Botnet DDOS (vs. Small Country only)</i>	Use IOT botnets to overwhelm a small countries internet infrastructure.	Any

China Existing Cyberattack Capabilities

Capability	Effect	Target
<i>AIS Spoofing</i>	Spoof a ships Automatic identification System to make it seem that the ship is somewhere else.	Any
<i>Disinformation Network</i>	Use a specific network (bots, media) to push a targeted message on social media.	Any
<i>Fake War Crimes</i>	Use actors and social media manipulation to create and push fictitious war crimes to smear the opposition.	Any
<i>Power Grid Vulnerability (Strategic)</i>	Exploit vulnerabilities for large-scale shut down of the enemy's power grid.	Taiwan
<i>Rail Network Vulnerability (Strategic)</i>	Exploit vulnerabilities to target singling systems and timetables to disrupt the enemies rail network.	Taiwan
<i>Space Launch Capability Vulnerability (Tactical)</i>	Target vulnerabilities in space launch capabilities to disrupt the launch of new satellites.	SpaceX
<i>Internet Disruption via IOT Botnet DDOS (vs. Small Country only)</i>	Use IOT botnets to overwhelm a small countries internet infrastructure.	Any
<i>Oil Infrastructure Vulnerability</i>	Attack oil pipeline PLC's to destroy and disrupt enemy civilian oil infrastructure.	Taiwan
<i>Phone Infrastructure Vulnerability</i>	Use exploits to degrade or disrupt phone infrastructure to support an operation.	Philippines
<i>Logistics Network Vulnerability (Tactical)</i>	Use access to part of an enemy's digital logistics system to cause temporary supply disruptions and issues.	JMSDF
<i>Logistics Network Vulnerability (Strategic Degrade)</i>	Use access to networked digital logistics systems to cause supply disruptions and issues throughout the logistics chain.	US PACCOM
<i>Port Manifest Attack</i>	Use access to a ports inventory tracking and manifest system to delete and inject information to sow confusion.	Pearl Harbor
<i>Port Manifest Attack</i>	Use access to a ports inventory tracking and manifest system to delete and inject information to sow confusion.	Guam
<i>Brick Headquarters</i>	Utilize existing access to a headquarters to deploy wipers to wipe all information and render computers inoperable.	Taiwanese 10th Field Army
<i>Brick Headquarters</i>	Utilize existing access to a headquarters to deploy wipers to wipe all information and render computers inoperable.	Taiwanese 6th Field Army
<i>Narrative Bombardment</i>	A narrative bombardment involves the coordinated use of as many means as possible to push a select message for a specific target demographic.	US social media
<i>Narrative Bombardment</i>	A narrative bombardment involves the coordinated use of as many means as possible to push a select message for a specific target demographic.	3rd World social media
<i>Port Infrastructure Attack</i>	Use access to port infrastructure to disable cranes, lock gates, and other actions to cause disruption.	Kaohsiung, Taiwan
<i>Port Infrastructure Attack</i>	Use access to port infrastructure to disable cranes, lock gates, and other actions to cause disruption.	Taipei, Taiwan
<i>IADS Vulnerability (Tactical)</i>	Degrade enemy IADS for a tactical operation.	Taiwan
<i>Undersea Cables Vulnerability</i>	Degrade or stop information flow across specific cables or exfiltrate information.	Asia, specify Taiwan
<i>GPS Vulnerability (Tactical)</i>	Degrade or shut down enemy GPS in support of a focused operation.	Local Area

France Existing Cyberattack Capabilities

Capability	Effect	Target
<i>AIS Spoofing</i>	Spoof a ships Automatic identification System to make it seem that the ship is somewhere else.	Any
<i>Civilian ATC Vulnerability (Tactical)</i>	Target vulnerabilities in civilian air traffic control to suspend civilian air traffic in specific locations.	South China Sea

Taiwan Existing Cyberattack Capabilities

Capability	Effect	Target
<i>Phone Infrastructure Vulnerability (Tactical)</i>	Use exploits to degrade or disrupt phone infrastructure to support an operation.	Fujian Province, China
<i>AIS Spoofing</i>	Spoof a ships Automatic identification System to make it seem that the ship is somewhere else.	Any
<i>Space Launch Capability Vulnerability (Tactical)</i>	Target vulnerabilities in space launch capabilities to disrupt the launch of new satellites.	China National Space Administration
<i>Space Launch Capability Vulnerability (Strategic)</i>	Target vulnerabilities in space launch capabilities to disrupt and degrade the launch of new satellites.	China National Space Administration
<i>Power Grid Vulnerability (Tactical)</i>	Exploit vulnerabilities for targeted shut down of the enemy's power grid.	Fujian Province, China
<i>Military ATC Vulnerability (Tactical)</i>	Target vulnerabilities in military air traffic control to temporarily suspend enemy air operations in specific locations.	Guangdong Province, China
<i>Military ATC Vulnerability (Strategic)</i>	Target vulnerabilities in military air traffic control to degrade adversaries' abilities to conduct air operations.	China
<i>Brick Headquarters</i>	Utilize existing access to a headquarters to deploy wipers to wipe all information and render computers inoperable.	PLAAF Airborne Corps HQ
<i>Port Manifest Attack</i>	Use access to a ports inventory tracking and manifest system to delete and inject information to sow confusion.	Xiamen, China

New Zealand Existing Cyberattack Capabilities

Capability	Effect	Target
<i>Narrative Bombardment</i>	A narrative bombardment involves the coordinated use of as many means as possible to push a select message for a specific target demographic.	PSIDS
<i>Port Manifest Attack</i>	Use access to a ports inventory tracking and manifest system to delete and inject information to sow confusion.	Quanzhou, China

Japan Existing Cyberattack Capabilities

Capability	Effect	Target
<i>AIS Spoofing</i>	Spoof a ships Automatic identification System to make it seem that the ship is somewhere else.	Any
<i>Port Infrastructure Attack</i>	Use access to port infrastructure to disable cranes, lock gates, and other actions to cause disruption.	Shantou, China
<i>Civilian ATC Vulnerability (Tactical)</i>	Target vulnerabilities in civilian air traffic control to suspend civilian air traffic in specific locations.	NE China
<i>Port Manifest Attack</i>	Use access to a ports inventory tracking and manifest system to delete and inject information to sow confusion.	Xiamen, China
<i>Stock Exchange Vulnerability</i>	Utilize vulnerabilities to mess with or damage a major stock exchange, causing chaos.	Shanghai Stock Exchange

United States Existing Cyberattack Capabilities

Capability	Effect	Target
<i>AIS Spoofing</i>	Spoof a ships Automatic identification System to make it seem that the ship is somewhere else.	Any
<i>Phone Infrastructure Vulnerability (Tactical)</i>	Use exploits to degrade or disrupt phone infrastructure to support an operation.	Shandong Province, China
<i>Civilian ATC Vulnerability (Tactical)</i>	Target vulnerabilities in civilian air traffic control to suspend civilian air traffic in specific locations.	SE coast of China
<i>Civilian ATC Attack (Strategic)</i>	Target vulnerabilities in civilian air traffic control to shut down civilian air traffic.	SE coast of China
<i>C2 Vulnerability (Strategic Degradate or Exfil)</i>	Degrade enemy C2 or remain undetected and exfiltrate information	Eastern Theater Navy HQ
<i>Satellite Communications Vulnerability (Strategic Degradate or Exfil)</i>	Degrade enemy satellite communications or remain undetected and exfiltrate information.	China
<i>Space Launch Capability Vulnerability (Tactical)</i>	Target vulnerabilities in space launch capabilities to disrupt the launch of new satellites.	China National Space Administration
<i>Civilian Telecoms Vulnerability (Tactical)</i>	Use exploits to degrade or disrupt phone infrastructure to support an operation.	Jainxgi Province, China
<i>Undersea Cables Vulnerability (Strategic Degradate or Exfil)</i>	Degrade or stop information flow across specific cables or exfiltrate information.	Most cables in the world.
<i>Brick Headquarters</i>	Utilize existing access to a headquarters to deploy wipers to wipe all information and render computers inoperable.	Southern Theater Airforce HQ
<i>Power Grid Vulnerability (Tactical)</i>	Exploit vulnerabilities for targeted shut down of the enemy's power grid.	Shanghai
<i>Power Grid Vulnerability (Tactical)</i>	Exploit vulnerabilities for targeted shut down of the enemy's power grid.	Zhanjiang
<i>Power Grid Vulnerability (Tactical)</i>	Exploit vulnerabilities for targeted shut down of the enemy's power grid.	Shantou
<i>GPS Spoofing (Tactical)</i>	Engage in a focused spoof of enemy GPS to cause issues with an enemy operation.	Any

Philippines Existing Cyberattack Capabilities

Capability	Effect	Target
<i>Narrative Bombardment</i>	A narrative bombardment involves the coordinated use of as many means as possible to push a select message for a specific target demographic.	Anti-China populations in SE Asian States
<i>Port Manifest Attack</i>	Use access to a ports inventory tracking and manifest system to delete and inject information to sow confusion.	Yantai, China
<i>Civilian ATC Vulnerability (Tactical)</i>	Target vulnerabilities in civilian air traffic control to suspend civilian air traffic in specific locations.	South China Sea

United Kingdom Existing Cyberattack Capabilities

Capability	Effect	Target
<i>GPS Vulnerability (Tactical)</i>	Degrade or shut down enemy GPS in support of a focused operation.	Local Area
<i>Stock Exchange Vulnerability</i>	Utilize vulnerabilities to mess with or damage a major stock exchange, causing chaos.	Beijing Stock Exchange
<i>Space Launch Capability Vulnerability (Tactical)</i>	Target vulnerabilities in space launch capabilities to disrupt the launch of new satellites.	China National Space Administration
